GENERAL REMARKS ON THE MONTH.

Temperature very little below average, in spite of 5 very cold days, 22nd to 26th. Mean temp^{e} for January 37°.

Rainfall less than half average.

The most striking feature of the weather was the very high barometer between the 6th & 26th. Most of the time it stood at or over 30·50 sea level & it reached 30·71 inches on Jan 23rd.

Max. temp. in shade 50° on the 1st & 2nd

Min. ,, ,, ,, 20 & 20½ on the 24th & 25th

Temp. in shade, at or below 32° on 13 days.

,, on grass, ,, ,, 32° on days.

GENERAL REMARKS ON THE MONTH.

A cold month but with no extremely severe frosts — Mean temperature 36° — Rainfall very slightly below normal. — Only three times in the whole winter has the therr. fallen below 20° in the shade, in spite of the mean tempe. for the last three months being decidedly below the average.

Max. temp. in shade 50° on the 19th & 28th
Min. „ „ „ 18° on the 3rd
Temp. in shade, at or below 32° on 17 days.
„ on grass, „ „ 32° on days.

GENERAL REMARKS ON THE MONTH.

A sunny month. Mean temp. 43°·35, about 3°·5 above average. Great daily range from 21st to end of month. On 28th a daily range (in screen) of 36°, the largest I have ever observed here. Rainfall very slight but number of rainy days about average. This warm March brings up the mean temperature of the whole winter season (Dec. to March incl.) to very nearly the average.

Max. temp. in shade 67° on the 30th

Min. " " " 21° on the 12th

Temp. in shade, at or below 32° on 11 days.

Sept 9th 1907

Dear Sir

Some days ago I wrote to you asking for some more rainfall postcards, since I could not find my father's supply. As I am not certain that the letter was posted here at all, I now write again, and, to save time, inclose the return for ~~Sept~~ August on paper. The weather this month has been most strange.

We had here on Tuesday night a minimum of 41½°, and on Wednesday a maximum of 56°, while on Thursday the maximum was 6[illegible]½° and the minimum for Thursday night 57°. Our total rainfall up to now, all on the 1st 5 days is 0.79 inch

Yours faithfully

H. E. Guillebaud

FORM A2. BRITISH RAINFALL.

9 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at The Warren Aldbourne

in the County of Wilts 5

by Henry Brown

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 550 ft.

1532

Time of Observation 9 a.m.

Nearest Railway Station
Name Ogbourne
Distance 4 Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name Devizes
Distance 5 m. Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

12 JAN 1911

Kept at Shepherds Shore Bishops Cannings Devizes 5

in the County of Wilts

by John Carter

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 555 ft.

Time of Observation 9 am

Nearest Railway Station
Name Devizes
Distance 6 mi Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

1 JAN 1910

Kept at Stockton House, Stockton

in the County of Wilts

by Geo. Knowles

RAIN GAUGE
Pattern Snowdon.
Diameter of top 5 in.
Height of top above Ground 1 ft. · in.
" " " Sea Level 260 ft.

Time of Observation 9. am

Nearest Railway Station
Name Wylye
Distance 2 miles Direction E.S.E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Wescombe, nr. Marlborough

in the County of Wilts .5

by K. A. MacAndrew

RAIN GAUGE
Pattern Snowden
Diameter of top 5 in.
Height of top above Ground one ft. – in.
" " " Sea Level 580 ft.

Time of Observation 9 am.

Nearest Railway Station
Name Grafton & Burbage
Distance 2½ miles Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
21 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Conholt Park.

in the County of Hants. Wilts.

by F. Wyatt. for E. A. Wigan Esq.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 800. ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Ludgershall.
Distance 5½ Direction S. W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. 7 JAN 1911

Kept at Market Lavington

in the County of Wiltshire

by Anne Pleydell Bouverie

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 9 in.
" " " Sea Level 290 ft.

Time of Observation 9.15 a.m.

Nearest Railway Station
Name Lavington
Distance 1 3/4 Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
5 JAN 1910

Kept at Charnage.

in the County of Wilts.

by Arthur R. White.

RAIN GAUGE
Pattern Round Funnel purchased [illegible]
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 426 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Gillingham
Distance 4½ m. Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
13 JAN 1910

Kept at Mere Exd RMf

in the County of Wiltshire

by Edwin Bracher

RAIN GAUGE
Pattern
Diameter of top .... in.
Height of top above Ground 1 ft. .... in.
" " " Sea Level .... ft.

Time of Observation 9 am

Nearest Railway Station
Name Gillingham
Distance 4½ miles Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at Stowell Park, Pewsey

in the County of Wilts: 3

by J H Smith Barry

RAIN GAUGE
Pattern
Diameter of top ____ in.
Height of top above Ground 1 ft. ____ in.
" " " Sea Level 450 ft.

Time of Observation

Nearest Railway Station
Name Pewsey
Distance 1½ mi. Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL
28 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Shrewton

in the County of Wiltshire 3

by F. J. Wardale Esq

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 9 in.
" " " Sea Level 322 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

10 JAN 1910

Kept at Ardath, Salisbury

in the County of Wilts

by Mrs T. Awdey.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 225 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Salisbury
Distance 1ml Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
10 JAN 1911

Kept at Wingfield Trowbridge
in the County of Wilts
by T. Herbert-Clark

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level ft.

Time of Observation 9 AM

Nearest Railway Station
Name Trowbridge
Distance 2 Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.
6 JAN 1910

Kept at Woodborough [illegible]

in the County of Wilts

by Mr. C. W. Hony

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 400 ft.

Time of Observation 9 am

Nearest Railway Station
Name Woodborough
Distance ½ m. Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Burderop ~~W~~ Swindon

in the County of Wiltshire 6

by A. Ashford

RAIN GAUGE
Pattern
Diameter of top ______ in.
Height of top above Ground ______ ft. ______ in.
" " " Sea Level ______ ft.

Time of Observation

Nearest Railway Station
Name
Distance ______ Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
